

who we are

Founded in 1963, the Bear Creek Group has grown significantly from its origins of a single, family-run logging company to be one of Northwest BC's most reputable multi-service group of companies. As a local organization with trademarks of innovation and integrity, Bear Creek is proud to employ a diverse team of community and safety minded professionals who produce world class results. While most of our work is based in Northwest British Columbia, we service all of BC and Canada.

what we do

The Bear Creek Group is a bonded general contractor, ready and able to meet your construction and transportation needs. With more than 50 years' experience living and working in remote locations and adverse conditions, we tackle challenging projects of varying sizes – safely, on time and on budget. Companies

Bear Creek Contracting

- Commercial Construction • Concrete • Drilling, Blasting & Crushing
- Earthworks • Road and Bridge Construction • Safety & First Aid
- Hydro Seeding • Site Reclamation • Storm Water Management

Skilled employees with experience on large projects, safe and professional business practices, and more than 200 pieces of modern equipment enable Bear Creek Contracting to foresee and resolve challenges quickly and effectively while keeping projects safe and on budget. Our certified safety officers (CSOs) ensure safety is top of mind for every worker. We also have a fleet of emergency vehicles that provide fast, professional and critical first aid services on demand – on your sites and ours.

Spring Creek & Prince Rupert Aggregates

- Crushing & Screening • Drilling & Blasting • Delivery • Quarry Development

Spring Creek Aggregates and Prince Rupert Aggregates offers a variety of high quality products, approved for marine and land development, and crushed and sized for your requirements. And we deliver, year-round.

North West Vac Truck Services

- Hydro-Excavation • Daylighting • Reclamation & Remediation
- Pressure Washing • Vacuum • Transportation

North West Vac Truck Services has the largest capacity hydro-vac trucks in Northwest BC. Our units feature dual compartment tanks (one for water, one for waste), a high pressure wash system, a boiler for winter applications and an overhead boom to maneuver hoses easily and quickly.

Ron King Trucking

- Trucking: Lowbeds, Step Decks, Hi-Boys, B-Trains & Side Dumps • Expediting

Ron King Trucking effectively manages challenging transportation needs including over-dimensional and overweight hauls. Ready at a moment's notice, we also offer expediting services – by road, air and water – specializing in accessing tough-to-access areas safely and efficiently. We are also an authorized dealer of Big Steel Box® container products for intermodal transport or storage.

Lakelse Air Ltd.

- Helicopter Services – Mining, Oil & Gas, Forestry, Aerial Construction & Recreational

The Bear Creek Group works closely with partner company Lakelse Air. With a reputation for speed, safety and agility, Lakelse Air is one of the largest and most called upon aviation companies in Northwest BC. Bases in Terrace, Prince Rupert and Bob Quinn offer charter and heavy lifting services. Bear Creek Contracting created Lakelse Air almost 20 years ago to support the needs of its clients.

Core Values

collaboration

Bear Creek's approach to diversity and cultures is one of respect and fairness. We are proud to be a significant employer and trainer of many local Aboriginal people, offering continuous growth and promotion. Our partnerships with Aboriginal business groups have also added great value to our company, clients and partners. Our Aboriginal business partners include:

- Hobiye Management Ltd. (Nisga'a)
- Tahltan Nation Development Corporation
- Qooluun Ventures (Haisla)

community

Our employees, owners and clients live in the communities we work in, so giving back is important. With pride, the company and its employees regularly sponsor, and participate and volunteer in community events, associations and working groups.

safety

Safety is paramount in everything we do. We prevent accidents by educating and empowering our workers through a comprehensive health and safety program, and strict policies. Digital Action Tracking System (DATS) helps us manage safety, and we maintain a COR certification for Enform. Unique to Bear Creek Group's companies, our partner company, Lakelse Air Helicopters, guarantees quick and immediate access to emergency services.

environment

We live here; Northwest BC's wilderness is our playground. So careful environmental practices is a personal *and* professional duty. The Bear Creek Group of companies is part of the world's most recognized environmental management standards family, the ISO14001.

people

We are proud of our skilled and professional employees and the career opportunities we offer. Bear Creek continually assesses and supports its workers and supervisors to ensure their level of training, knowledge of industry standards, and health, safety and environmental practices are current and comprehensive. To increase capacity and offer better service to our clients, the company has developed in-house skills training.

excellence and innovation

We have more than 50 years' experience of delivering quality craftsmanship and service. We began as a forestry company specializing in remote, difficult-to-access terrain and our attitude of getting the job done right, no matter what it takes, still exists today. We work closely with our clients to understand, anticipate and exceed their vision and requirements – safely, smoothly, on time and on budget. We approach all of our work and business practices with creativity and innovation. To reduce costs and deliver maximum value, we push ourselves as a company and individual professionals to continuously grow, learn and improve. Bear Creek strives for a better way, always.
